Minute 10 - Reportsa. **Executive Director's Report**

## (1) Outfall Relocation Project - Tunnel Project

Facility Engineer Anastasio gave a visual presentation of the Tunnel Project so that Board Members who were not able to be part of the visual presentation/tour of the Tunnel Project on December 10 would have a better understanding of the complexity of the Project. Mr. Anastasio briefed the Board Members on the work performed by the shield operator who steers the shield to maintain the laser beam on a fixed target within the tunnel shield. He went on to report that throughout the tunneling operation no bedrock had been encountered. Through the pictures, Board Members were able to see, as well as have a better understanding of, the actual operation within the tunnel.

## (a) Report on Change Order No. 2

Mr. Anastasio reported that this Change Order is for the repair of defective work in the existing sluice gate chamber that was discovered by the Contractor and Engineer during preparations for the hydrostatic testing. With the completion of this work, the structure will be able to withstand the original design of a hydrostatic test pressure of 10 psi. Also, the addition of the two additional sleeve port pipes were necessary to allow for the additional permeation grouting beyond the original estimated bid item which was required based on conditions encountered during construction.
