Chairman Guttschall stated that there were no Board Committee Reports and that he did not have anything else to add.

Minute 10 - Reports

- a. **Executive Director's Report**

- (1) Outfall Relocation Project - Tunnel Project

Mr. Anastasio reported that at last month's meeting he stated that the job was at a point where there was no more base contract work and that there was a situation where the south leg of the pipeline was leaking and three months had been spent trying to find the leak.

Mr. Anastasio went on to state that there were two options to consider; delay the contractor or enter into a change order with them to make certain repair and then try to do a retest. A brief discussion ensued.

(a) Report on Change Order No. 3

Mr. Anastasio reported that the largest part of Change Order No. 3 was for the making of the repairs and doing the additional retesting. Additionally, Mr. Anastasio reported that the fall-back plan is to try to determine where the leaks are. In the event that this does not work, the fall-back plan was to let the contractor do base work and ties in the outfall at the end of the project and close the sluice gate. This would avoid a situation of delaying the contractor. Mr. Anastasio reported that Change Order No. 3 consists of a number of components in trying to get the problem with the south line solved and get it to pass. A number of the components of the Change Order are attributed to Carbro not doing the hydrostatic testing.

Attorney Maraziti commented that if the Board went on to approve the changes to Change Order No. 3 and the contractor approves it, it amounts to a modification of the contract and there is express language in the Change Order whereby the contractor waives any claims associated with the work and that it would stop any residual claims up to this point the contractor would have.

Mr. Machala had a question regarding the grouting of the seams. Mr. Brandes prepared a sketch to help Board Members better understand how/where the grouting was done.

(2) Update on repairs to Incinerator No.2

Assistant Executive Director/Facility Engineer stated that there was good news to report on the repairs on Inc. No. 2. Plant Superintendent Thompson reported that Inc. No. 2 was running and that a comment was made that "it was almost like a new incinerator". Mr. Thompson reported that it was running at about 150 wet lbs/min. and that they were catching up on inventory.

Chairman Guttschall asked whether an eye was being kept on the instrumentation, to which Mr. Thompson responded yes. Mr. Thompson stated that Maintenance Supervisor Tambasco always comes up with unique ideas and went on to report that the fluidized bed blower was running backwards (would have to physically change the wiring) and it is not known how that could be happening, but the incinerator is burning.

(3) Report on Ash Disposal Shared Services Agreement

Mr. Anastasio reported that the Authority has another contract (3-year) with PCFA with good prices. Mr. Thompson reported that the Authority did well with the pricing in the Agreement.
